

Date: _____

To the Parent(s)/Guardian(s) of _____,

Recently, the WIDA MODEL or W-APT screening assessment was administered to determine your child's English language proficiency. The screening assesses speaking, listening, reading, and writing of the English language (only speaking and listening are assessed at the kindergarten and first trimester of 1st grade levels).

This screening test is given when parents indicate that a language other than, or in addition to, English is spoken in the home on the Home Language Survey completed at the time of registration.

The results of this assessment show that your child meets the state standard for English proficiency. This means your child's English proficiency is sufficient to experience success in the classroom without the additional support from the English Language Learner Program (ELL) program.

If you have any questions, feel free to contact the building Principal.

Sincerely,
